2. Select page ranges to import: all or customize certain pages. Don't know which pages to import? The Preview window allows you to view each page of the PDF file.
3. Set page quality: Higher, High, Medium, Low and Lower.
4. Choose page format: Vector (.swf) or Raster(.jpg).
5. Other import options:
 - **Import bookmarks:** Bookmarks in the PDF file will be available in the converted flipbook if you check this option.
 - **Support searching:** Search any content within the flipbook.

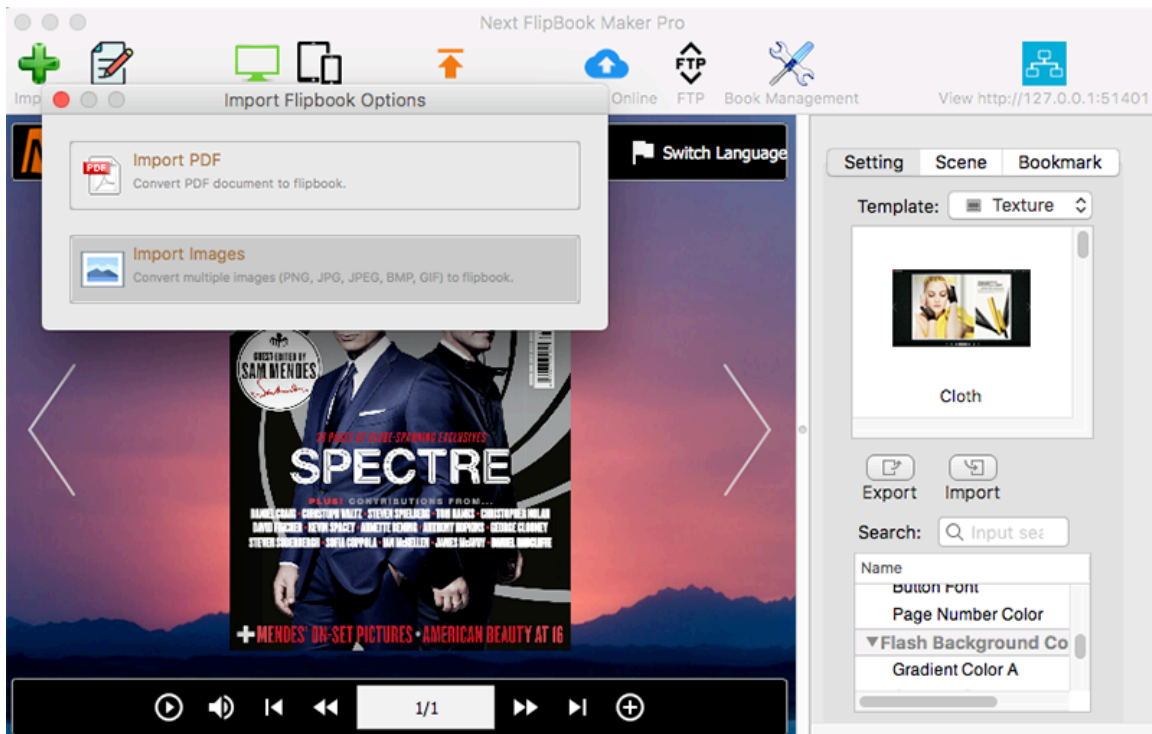

- **Import links:** Links in the PDF file will be preserved in the converted flipbook if you check this option.
- **Detect wide pages:** Automatically detect wide page and then split it into two pages.

After all these settings, click Import button. Then you can see the PDF file in the interface. Now the page-flipping effect is added; what you see in the display area is what your flipbook looks like after creation, so you may want to make some changes.

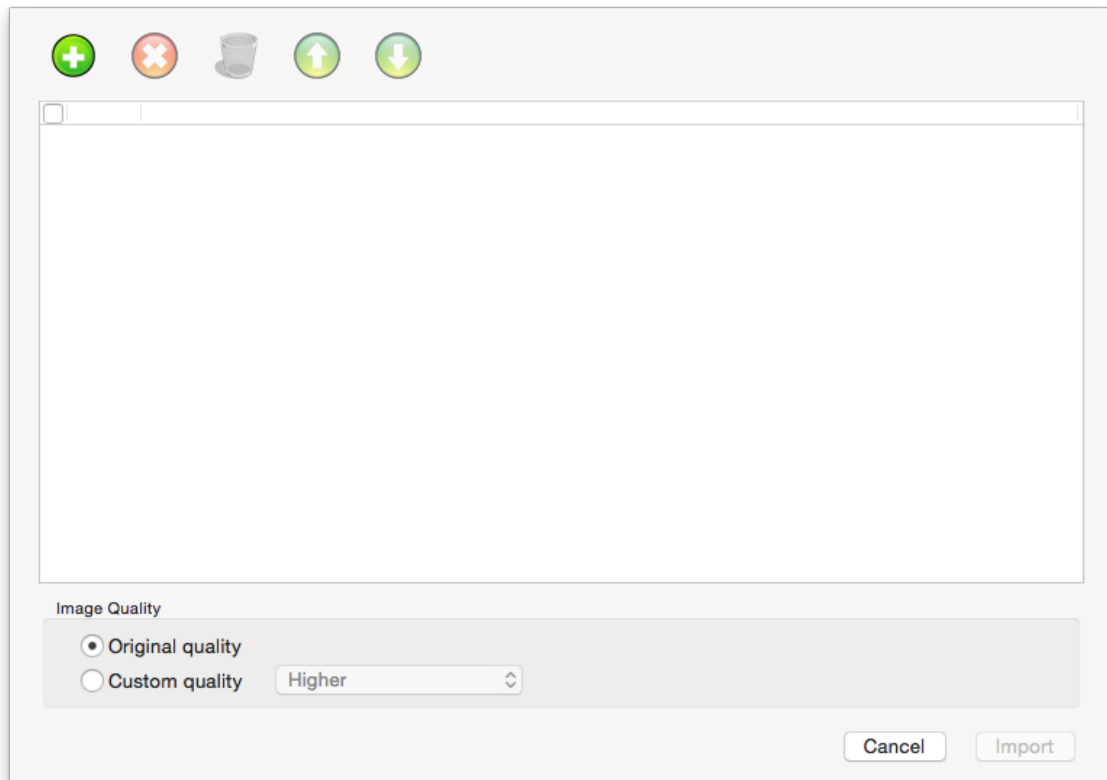

Import images

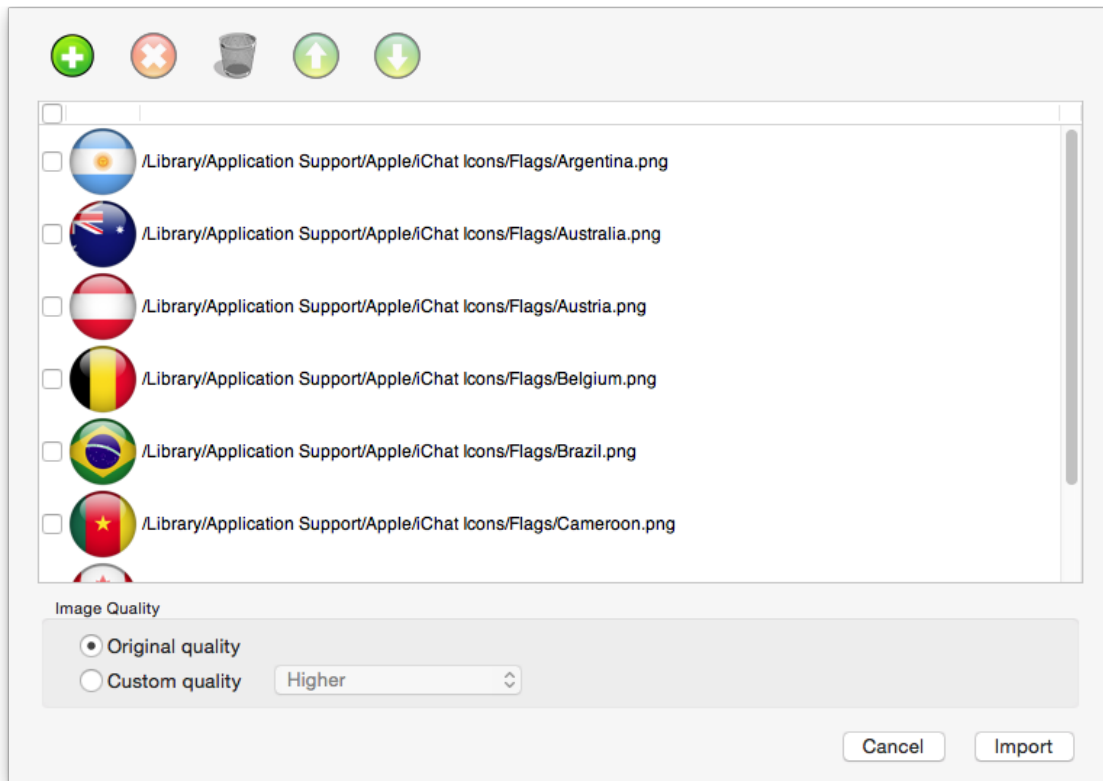

Click the Import images button:

Click  to add images,  to remove unwanted ones,  to delete all,  and  to adjust orders.

Set the image quality and click Import.

2. Setting, Template, Scene and Bookmark

As you can see in the right side of the interface, there are 3 tabs: Setting, Scene, and bookmark, where you can customize your flipbooks for the best reading effect.
