1. Import PDF files or images

Import PDF files

1. Click the Import button. Click Browse button to choose PDF files you want to convert. You can click Preview button to open the chosen PDF file and clarify.

2. Select page ranges to import: all or customize certain pages. Don't know which pages to import? The Preview window allows you to view each page of the PDF file.

3. Set page quality: Higher, High, Medium, Low and Lower.

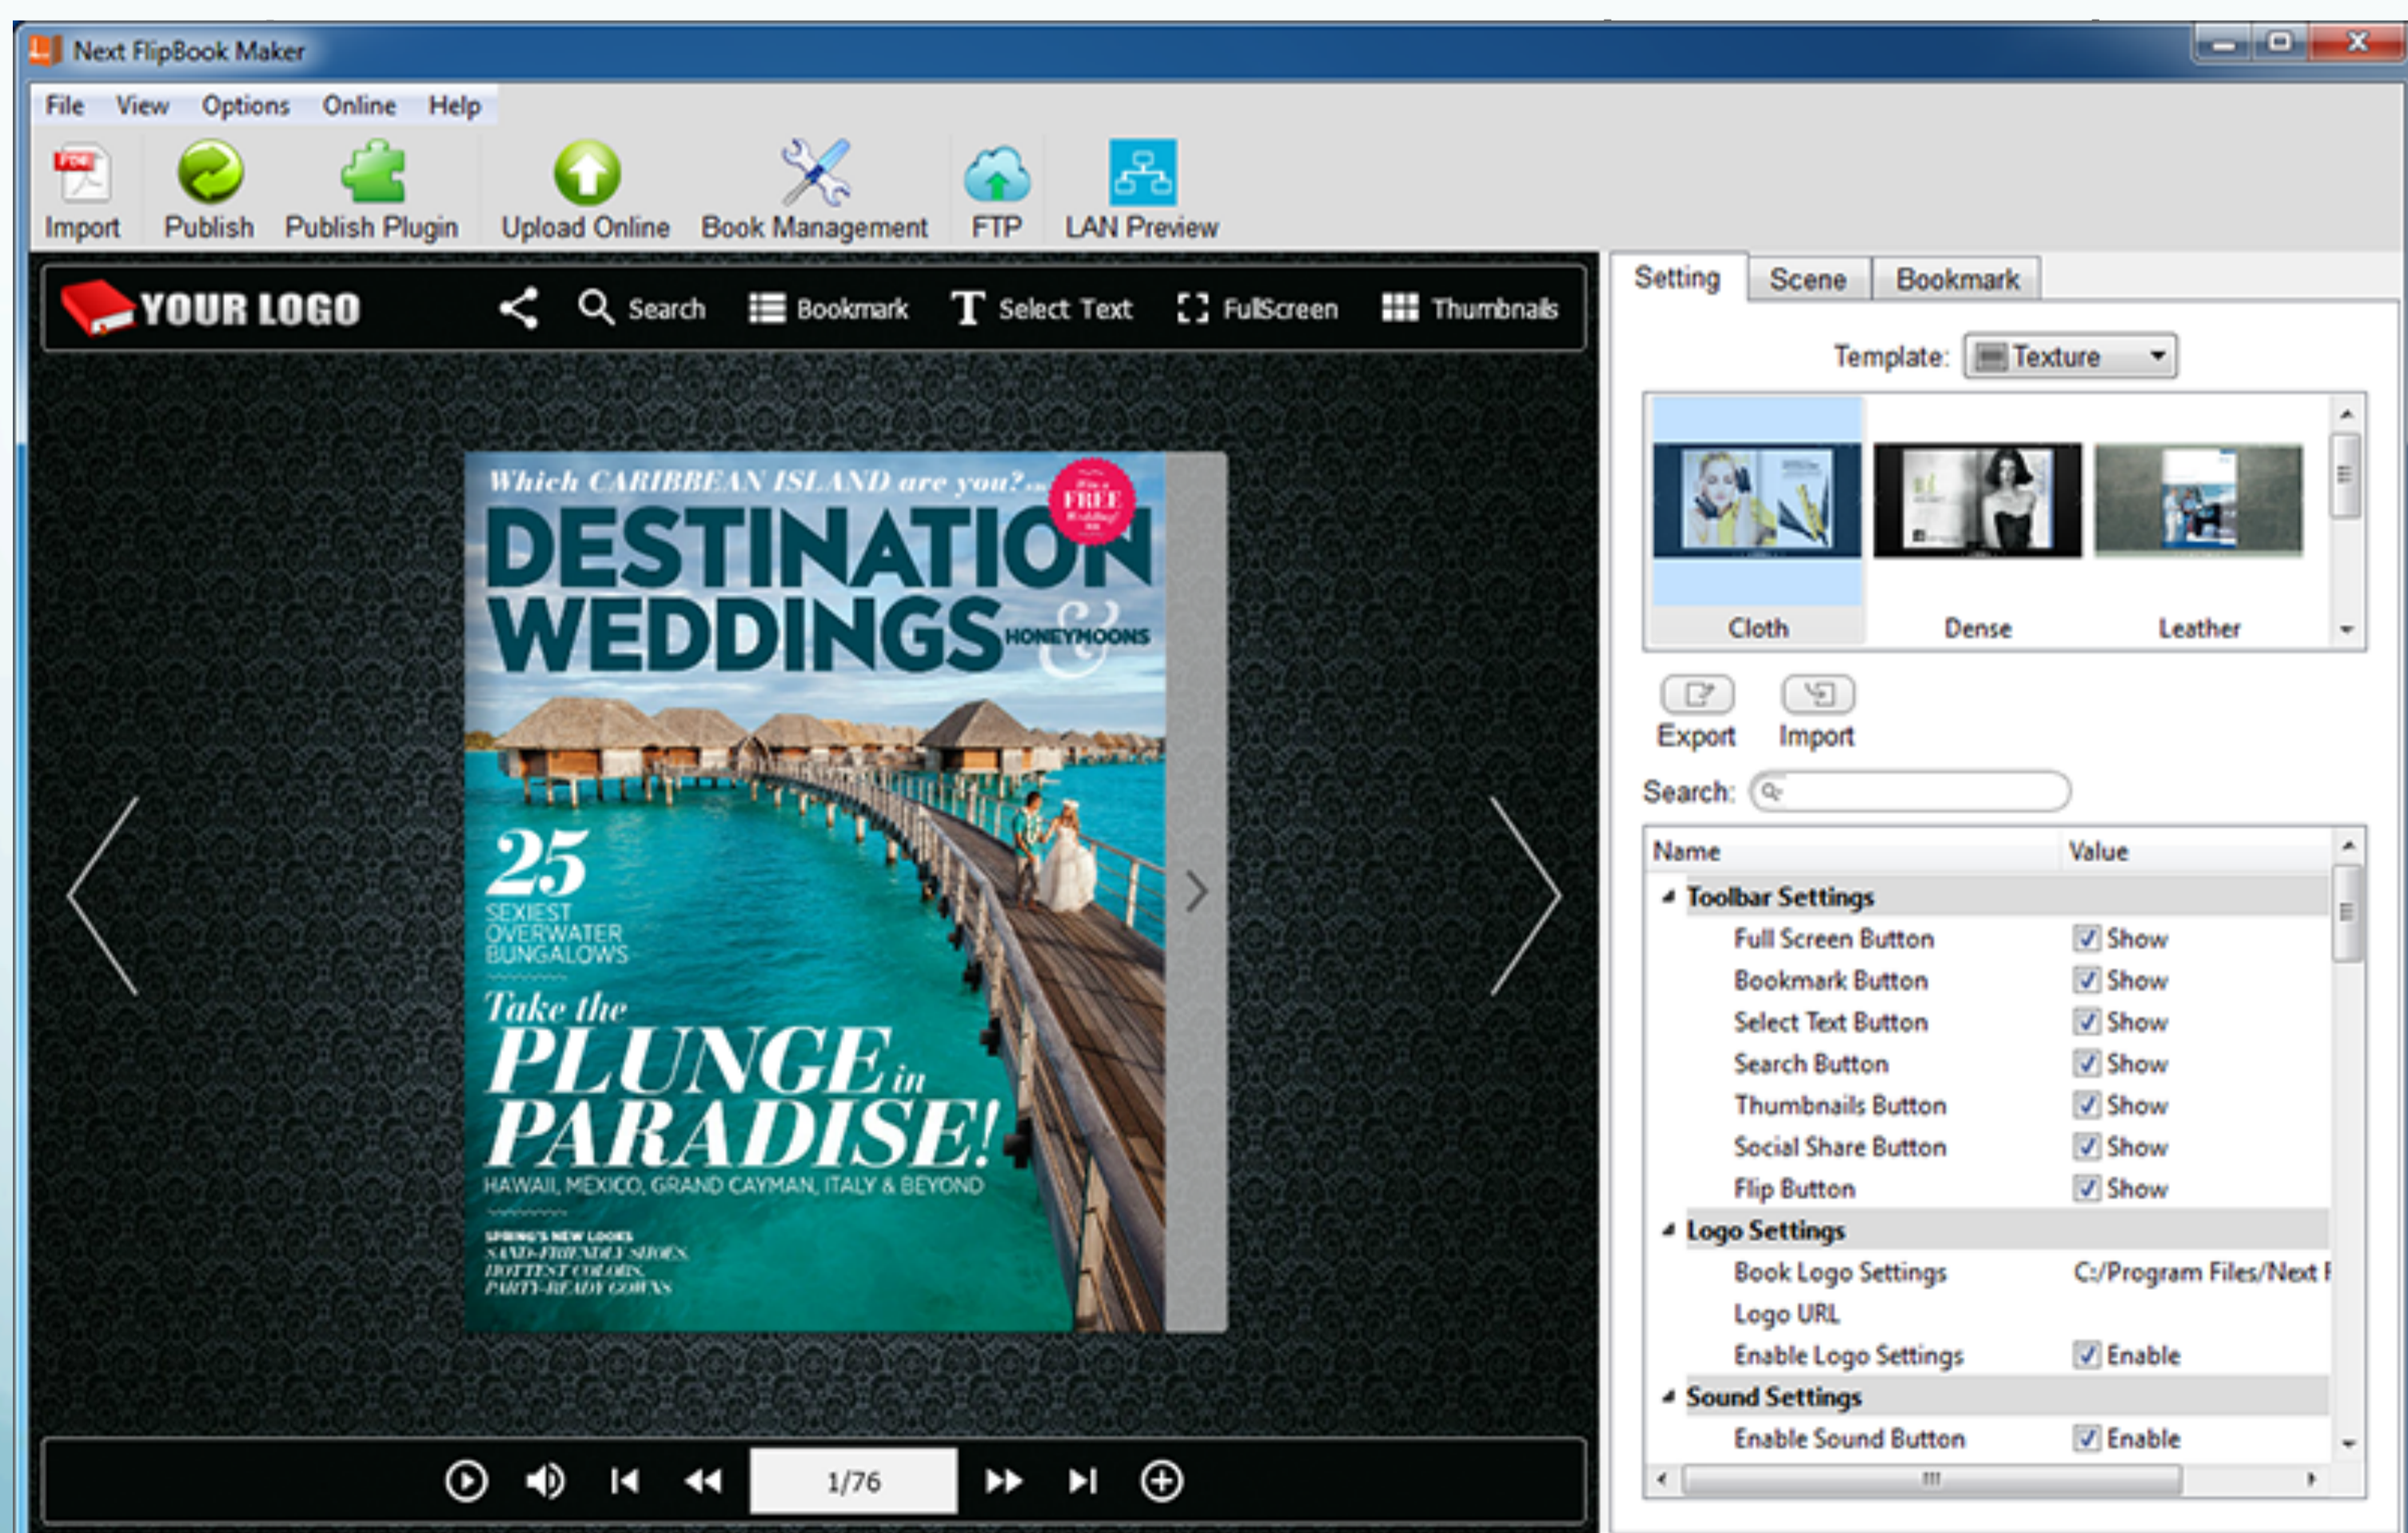

4. Choose page format: Vector(.swf) or Raster(.jpg).

5. Other import options:

Support searching: Search any content within the flipbook.

Import links: Links in the PDF file will be preserved in the converted flipbook if you check this option.

After all these settings, click Import button. Then you can see the PDF file in the interface. Now the page-flipping effect is added; what you see in the display area is what your flipbook looks like after

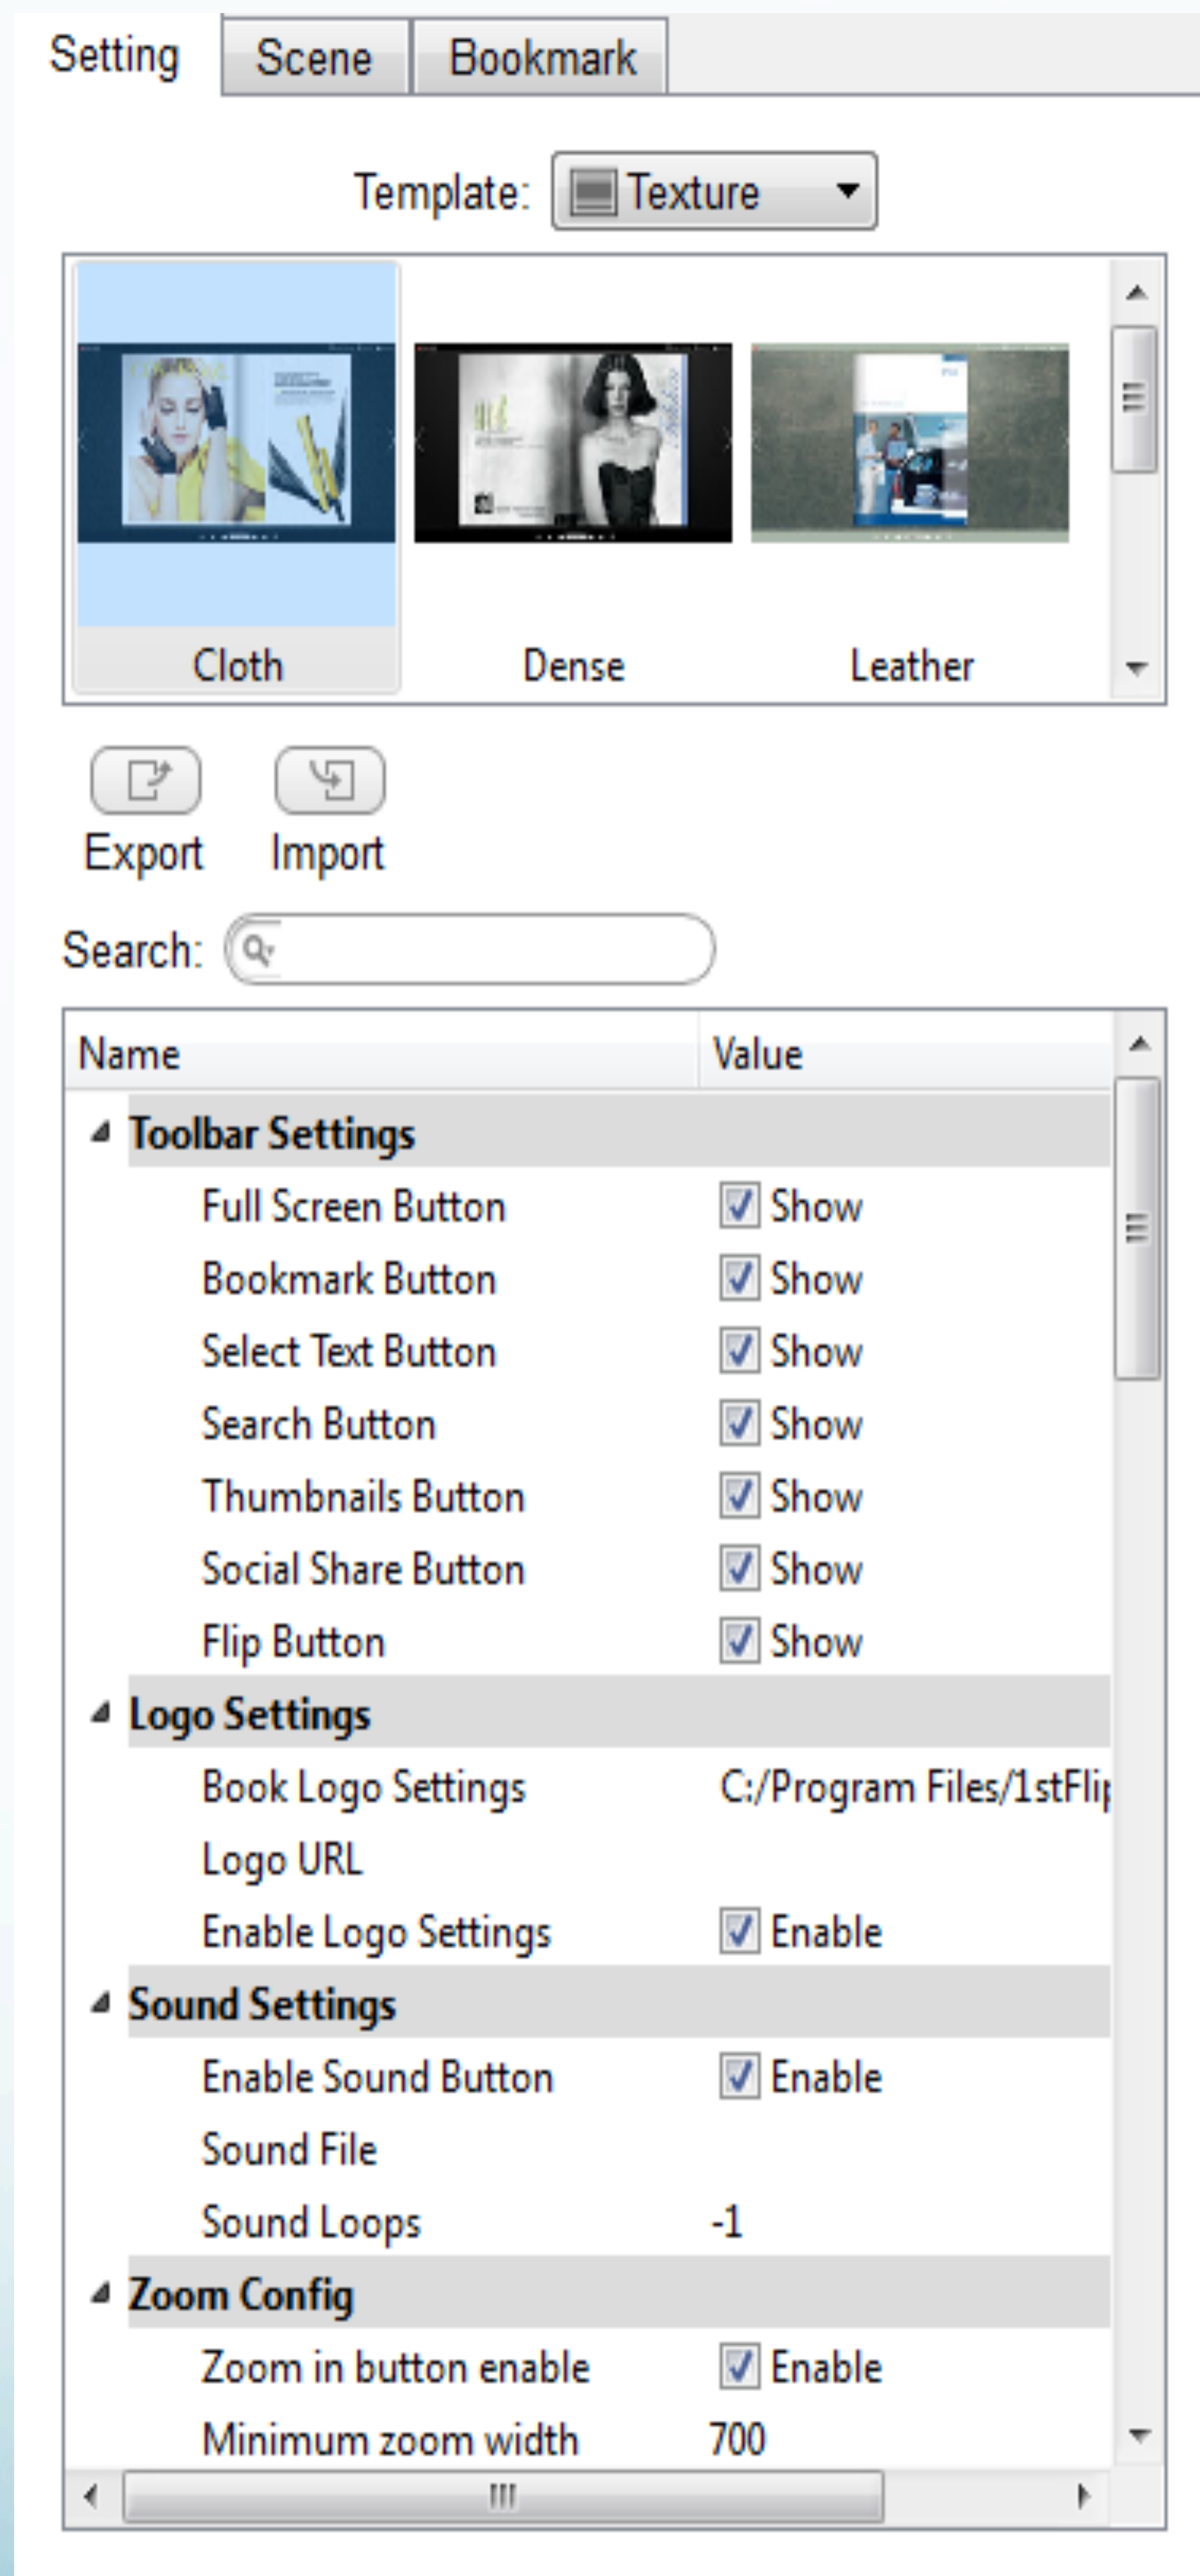

2. Setting, Template, Scene and Bookmark

As you can see from the right side of the interface, there are 2 tabs: Setting and Scene, which allow you to customize your flipbooks for the best reading effect.

- **Setting.**

This tab contains two parts: Template and detailed settings.

Template means how the flipbook toolbar is displayed. Here are two categories: Geometry and Texture, contains 5 samples respectively. Choose one you like.

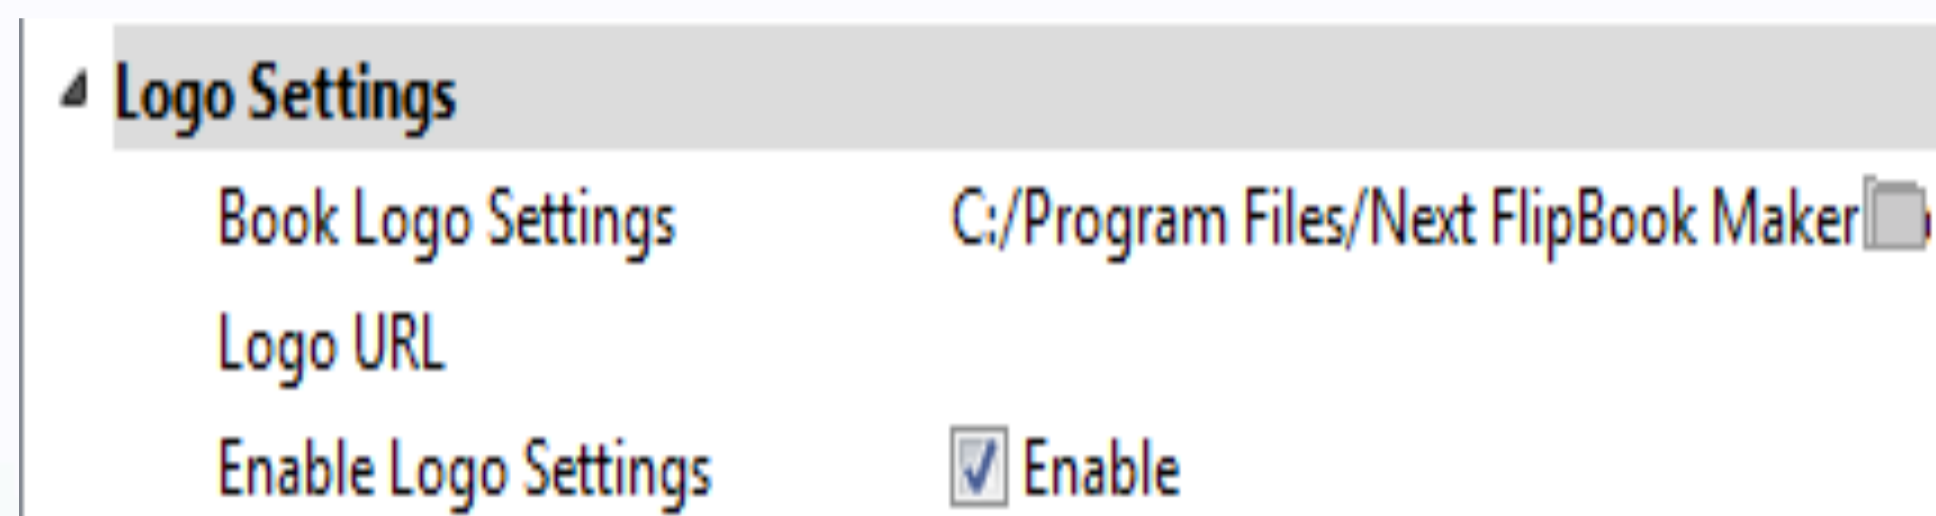

Besides, you can export and import samples.
